Peter Hasenkamp - TCC's Strategic Advisor for Global Supply Chain Strategies

Peter's experience and understanding of the Automotive industry is exemplary. He is a highly accomplished purchasing and product development leader with more than 20 years of experience in automotive supply chain management, international operations, product development and team leadership.

Till recently, Peter was Lucid Motors' Vice President of Supply Chain, responsible for sourcing, selecting, and ensuring the quality of Lucid's key suppliers, and managing the global logistics strategy between supply chain and manufacturing. He has a proven track record of building successful teams and achieving product and organizational goals in fast paced and dynamic environments.

Peter started his career with NASA at the Ames research center in California as a research engineer. Prior to joining Lucid Motors, he was Director of Vehicle Systems Purchasing at Tesla, where he established and executed the initial ground-up strategic sourcing plan for the Model S, helped recruit the team responsible for all procurement and supply chain management operations, and launched the product and supply base in a record three-year timeframe.

Peter previously spent ten years in product development at Ford Motor Company, working in Engineering and Program Management leadership roles on various car programs in both Detroit and in Europe.

Peter holds a B.A. in Engineering and a Masters of Engineering Management from Dartmouth College.
